E-Courier	Parcel Delivery and Courier Management System (**Upcoming in Codecanyon**)	**Project demo from my own C-Panel:** https://bdcodersit.com/e-courier/admin
Yes Cable	Inventory Management System (**BD Client Project**)	**Client C-Panel link:** https://mrab.yescabel.com **Project demo from my own C-Panel:** https://bdcodersit.com/yes-cable
Federation	Multi Level Marketing Investment Platform (**International Client Project**)	**Client C-Panel Link:** https://member-federation.com **Project demo from my own C-Panel:** https://bdcodersit.com/federation/admin

Federation Project Summary:

This project was entirely developed by me for an international client. In this project almost 2 years, I have fulfilled all the requirements of the client as an employee of Bug Finder and provided support. The project is still running. Through this project, I gained significant experience working with large-scale data. It required numerous performance optimizations. The project has over twenty thousand real users and involves millions in investments and transactions. To showcase the project, I uploaded it to my own cPanel and shared the demo link for visualization purposes.

Junior Software Developer (Intern)

So Close Dhaka Ltd. (France)

Mar 2022 – Aug 2022

Working Projects
Support Ticketing System, Web Agency
